# Abstract

WorkHouse acts as a pivotal broker between skilled job seekers and users seeking quick solutions. This user-friendly website allows users to effortlessly post job listings, specifying the required service and associated time constraints. Job seekers can create detailed profiles, showcasing their expertise, qualifications, and availability. The platform boasts essential features, including a robust search and matching system, a secure payment gateway, and a transparent rating and review system, ensuring a reliable and efficient exchange between both parties. By fostering direct communication, WorkHouse streamlines the process of hiring temporary workers for small-scale projects, providing a convenient and effective solution for users and job seekers alike. With its commitment to transparency, efficiency, and community-building, WorkHouse emerges as a dynamic and indispensable hub for one-day job opportunities.

- [?].

# Introduction

A web platform designed to simplify the process of hiring workers for short-term services such as electrical works, plumbing ,catering,cleaning etc. This platform serves as bridge between job seeker and those in need of immediate services .

# Proposed System

website primarily gives two options:

## **1) To login as a user**

The user can create an account using their email ID and password . Once the worker is chosen, the user gets an option to communicate with the worker either through the website or through their contact number and make the negotiations. Based on their understandings and preferences the worker can be either hired for a temporary period or as a fulltime employee.

## **2) To login as an employer**

All the daily wage worker has to do is to create an account by using their email ID and password and provide their details such as Name, Location, Age, Phone number, Religion, Photo, Gender, comfortable languages, experience, etc. Once the employer is logged in, he/she can filter the available workers based on their requirement of Roles ( Plumbers, painters, carpenters, mechanics, etc.), Location, Age, Gender, Experience, etc..

# Proposed System

**In our project, we include offers only from famous apps like Flipkart, Amazon, etc., especially for home products. This will be beneficial for workers, and users will be able to buy goods at discounted prices.**

Figure: Amazon

Figure: Flipkart

## Helpers near me

1. <https://helpersnearme.com/>

Find multiple legally verified Workers near you, pay a nominal fee, connect with them directly hire anyone you like. And if it doesn't work out, ask for a 100% refund within 15 days of your order.

## Broomeers

2. <https://broomeers.com/>

Broomeers is the simplest way to get your life in order with the right domestic help.

## **1) Generate Employment :**

- Facilitate job opportunities for individuals seeking short-term tasks, boosting income and financial stability.

## **2) Empower Newcomers :**

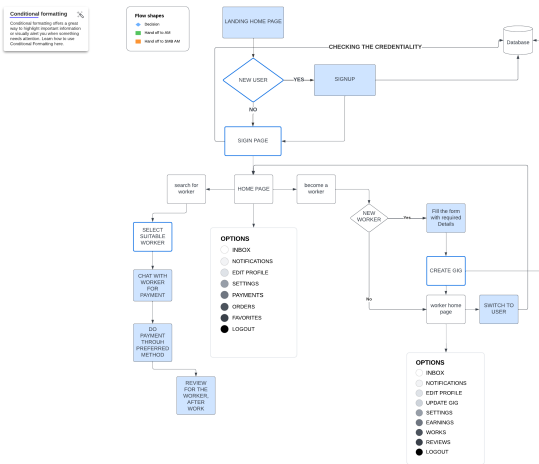

training to newcomers, empowering them with skills for job entry and advancement.

## **3) Enhance Accessibility :**

- Connect users with skilled workers easily, ensuring accessibility to essential services like electric work, plumbing, catering, and cleaning..

# Advantages for Job Seekers

## **Flexibility and Control**

- Choose the job that fits your schedule and interests, allowing you to earn income whenever you want.

## **Variety of Work**

- Explore different fields and skills.

## **Faster Income**

- Get paid directly after completing work without the wait of traditional pay schedules.

## **Build Your Network**

- Gain valuable experience and connections, boosting your future career prospects.

## **Convenience and speed**

- Find qualified service providers quickly and easily for immediate needs.

## **Cost-Effectiveness**

- Pay only for the specific services of longer term contacts.

# Future Scope

- **Job Listings:** These platforms provide extensive databases of job openings across various industries, sectors, and job roles. Users can search for specific positions based on their qualifications, experience, location preferences, etc.
- **Networking and Professional Connections:** Certain job search websites function as professional networking platforms where users can connect with recruiters, industry professionals, and potential employers. They may include features for networking, building connections, and joining professional groups or communities.
- **Resume/CV Posting and Building:** Many job search websites allow users to create and upload their resumes or curriculum vitae (CVs) to apply for jobs directly through the platform. Some sites also offer tools to help users build or improve their resumes.
- **Skill Enhancement and Training:** Future enhancements could include features for skill development and training.

## **What Is a Conclusion?**

While all the existing systems stay relevant in the online hiring process between the common people (employers) and the daily wage workers (employees). Having the right tool to facilitate the process is of paramount importance to both the daily wage workers and people like us, as such the proposed system shall provide a reliable web platform which will not require any pre-requisite installations and can be used on any device with minimal internet connection.
